Become a Forward Deployed AI Engineer

A 5-month executive program from industry experts

Live online | Hands-on | Job-oriented

Enroll now >

Our learners and corporate cohorts are from:

PwC	Hexaware	Microsoft
ZS Associates	Sigmoid	Novartis

Estimated time

5 months (22 weeks), live online

Enroll by

Rolling admissions. Ask for the next cohort date.

Prerequisite

Python and 2+ years of engineering experience (or strong projects)

Introduction

AI pilots are everywhere. Production deployments are rare. Companies now need engineers who can sit with the customer, scope an ambiguous problem, build the system, deploy it into a secured enterprise environment and own the result. That engineer is the **Forward Deployed Engineer (FDE)**.

Public job data shows FDE listings growing sharply (Indeed, as reported in June 2026), while hiring stays selective and referral-led. The DataMarcos FDE program is built around the real job: discovery, build, secure, deploy and hand over. It is taught live by a practising architect with 18+ years of experience who has trained 25,000+ professionals.

Skills required to become a Forward Deployed Engineer

- ✓ Strong **Python and API engineering** to build and integrate production systems.
- ✓ **Cloud, networking and DevOps** fundamentals: containers, CI/CD and infrastructure as code.
- ✓ **Applied AI**: LLMs, RAG, agents, evaluation and cost control.
- ✓ **Security and compliance** thinking for regulated enterprises.
- ✓ **Integration** with legacy systems, data platforms and enterprise tools.
- ✓ **Customer craft**: discovery, scoping, ROI and clear executive communication.

Your journey in six steps

From application to a deployed portfolio and a job-ready profile

01 Apply and take the diagnostic

02 Learn live from a practising architect

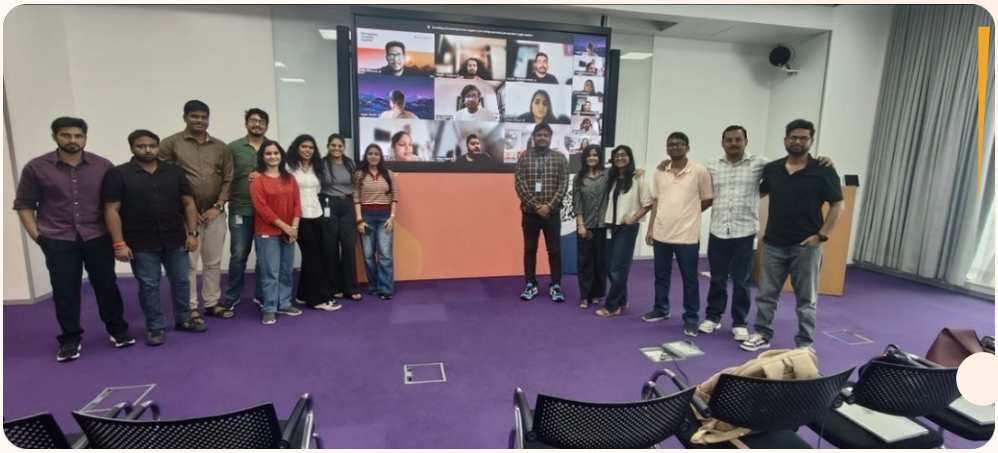

03 Build in four client-style engagements

04 Secure and deploy on real cloud stacks

05 Defend your capstone at Demo Day

06 Launch with career support

Glimpse of our workshops

Program skeleton

Delivered over 22 weeks in five phases: foundation, GenAI systems, agents and integration, production and security, capstone

- FDE role, discovery and scoping
- APIs, cloud and CI/CD
- LLM engineering and evals
- RAG, graphs and multimodal
- Agents, LangGraph and MCP
- Legacy and enterprise integration
- Databricks, Snowflake and cloud agent platforms
- AI security and guardrails
- Governance: DPDP, GDPR, HIPAA, EU AI Act
- LLMOps and observability
- UAT, handoff, ROI and QBRs
- Interview loops and portfolio

Roles you become ready for

Role readiness, not a placement guarantee. Hiring outcomes depend on your effort and the market.

- AI Forward Deployed Engineer
- AI Solutions Engineer
- Agentic AI Engineer
- GenAI / LLM Application Developer
- Platform FDE (Databricks, Snowflake)
- AI Automation Engineer
- AI Solutions Architect
- AI Delivery Lead
- Technical Consultant, AI

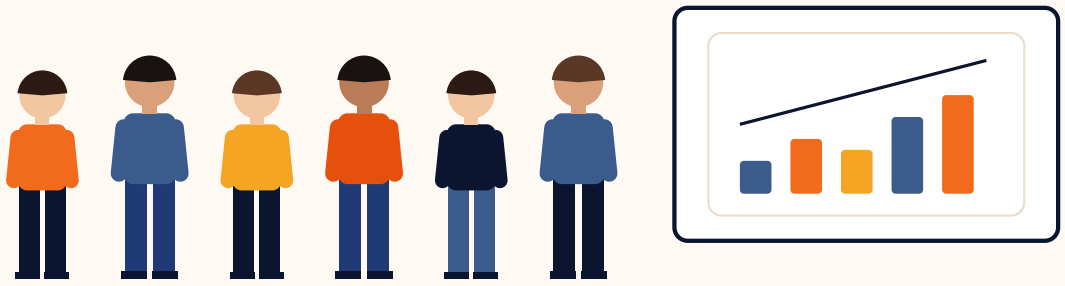

Industries that need Forward Deployed Engineers

FDEs work wherever AI has to run inside real, regulated, messy environments

- Banking and Finance
- Healthcare and Life Sciences
- Retail and E-commerce
- Telecom
- Manufacturing
- Logistics
- Energy and Utilities
- Public Sector
- SaaS and AI Labs
- Consulting and GCCs

Future-proof your career

FDEs sit where engineering, AI and the customer meet. Tools and models will keep changing. The ability to scope a problem, build the system, secure it and own the outcome keeps its value, which is why every phase of the program is built around real engagements rather than slides.

Learning methodology

Learn it, build it, deploy it

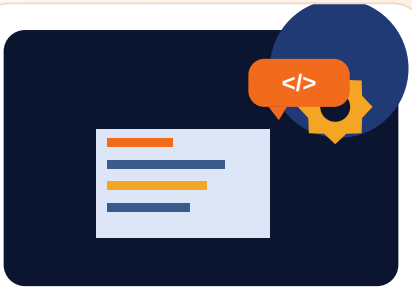

LEARN

Live architecture sessions

Mentor-led sessions on the why, the trade-offs and the platform internals.

Benefits: Real-time Q&A, architecture reviews and a shared peer cohort.

Ideal for: Building strong mental models before you code.

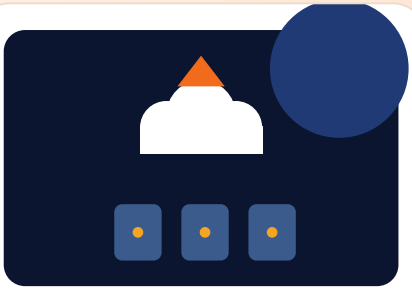

BUILD

Hands-on delivery labs

Weekly labs and code reviews on your own work, not toy datasets.

Benefits: Feedback on design, security and tests, plus a reusable FDE toolkit.

Ideal for: Turning concepts into deployed systems.

DEPLOY

Client-style engagements

Four engagements with stakeholders, constraints and panel reviews.

Benefits: Portfolio-ready work and interview-ready stories.

Ideal for: Practising the full job from discovery to handoff.

Why DataMarcos

Expert instruction
Learn from a practising architect with 18+ years of experience and 25,000+ professionals trained.

Real engagements
Four client-style engagements, each reviewed by a panel, with a toolkit you keep.

Flexible, serious schedule
Weekend sessions with weekday labs, designed for working professionals.

Career support

- **FDE interview loops and mock rounds**
- **Resume, LinkedIn and portfolio reviews**
- **Referral and outreach playbook**

We do not promise placements, salaries or hikes. We promise deployed, secured, documented systems and the ability to explain every design decision.

What our alumni say

KG

Kumar Gaurav
Senior Azure Data Engineer, PwC

"His deep understanding of the subject, combined with a clear and engaging teaching style, made complex concepts easy to grasp, even for those new to the field."

AR

Ansh Ranjan
Data Engineer Trainee, Hexaware

"Learning under Deepesh Sir has been a great opportunity. He is truly a great mentor."

GT

Gourav Thadhani
Data Science and AI, ZS Associates

"Many thanks for the great Databricks training at ZS! Let's stay connected."

Feedback shared by learners across DataMarcos data, GenAI and AI programs.
